MINISTRY OF HOME AFFAIRS

(Department of Personnel and Administrative Reforms)

New Delhi, the 24th September, 1982

- G.S.R. 879.—In exercise of the powers conferred by the proviso to article 309 of the Constitution, the President hereby makes the following rules regulating the method of recruitment to the post of Training Equipment Operator in the Department of Personnel and Administrative Reforms (Personnel Wing) Ministry of Home Affairs, namely:—
- 1. Short title and commencement.—(1) These rules may be called the Department of Personnel and Administrative Reforms (Personnel Wing) Group 'C' post of Training Equipment Operator Recruitment Rules, 1982.
- (2) They shall come into force on the date of their publication in the Official Gazette.
- 2. Number of post, its classification and the scale of pay.— The number of post, its classification and the scale of pay attached thereto shall be as specified in columns 2 to 4 of the Schedule annexed hereto.
- 3. Method of recruitment, age limit and qualifications, etc.—The method of recruitment to the said post, age limit,

qualifications and other matters relating thereto shall be as specified in columns 5 to 13 of the said Schedule.

- 4. Disqualification.—No person,
- . (a) who has entered into or contracted a marriage with a person having a spouse living, or
- (b) who, having a spouse living, has entered into or contracted a marriage with any person

shall be eligible for appointment to the said post:

Provided that the Central Government may, if satisfied that such marriage is permissible under the personal law applicable to such person and the other party to the marriage and that there are other grounds for so doing, exempt any person from the operation of this rule.

- 5. Power to relax.—Where the Central Government is of the opinion that it is necessary or expedient so to do, it may, by order, for reasons to be recorded in writing, relax any of the provisions of these rules with respect to any class or category of person.
- 6. Saving.—Nothing in these rules shall affect reservations, relaxation of age limit and other concessions required to be provided for the Scheduled Castes, the Scheduled Tribes and other special categories of persons in accordance with the orders issued by the Central Government from time to time in this regard.

3. In the Schedule to the Union Public Servee Commission (Ex-cadre Posts) Recruitment Rules, 1959, in Item No. 11 relating to the post of Research Assistant, in column 11, for the-existing entry, the following entry shall be substituted, namely:—

"Promotion

Computors with at least five years' regular service in the Grade.

Transfer on Deputation/Transfer:

Upper Division Clerks of the Central Secretariat Clerical Service and Stenographers Grade 'D' of the Central Secretariat Stenographers Service with at least three years' regular service in the respective Grades and possessing the qualifications prescribed in column 7.

(Period of deputation shall ordinarily not exceed three years).

- 4. In the Schedule to the Union Public Service Commission (Ex-cadre Posts) Recruitment Rules, 1959, in Serial No. 33 relating to the post of Offest Printing Machine Operator—
 - (i) in column 4 for the oxisting entry, the following entry shall be substituted, namely:—

"Rs. 425-15-500-EB-15-560-20-700";

(ii) in column 6 for the existing entry, the following entry shall be substituted namely:

"Not exceeding 28 years (Relaxable upto the age of 35 years for Government servants in accordance with the instructions or orders issued by the Central Government)

Note: The cruial date for determining the age limit shall be the last date fixed for sending names by the Employment Exchange";

(iii) in column 7 for the existing entry, the following entry shall be substituted, namely: —

"Essential:

- (i) Matric pass or equivalent from a recognised University, Board of School.
- (ii) Certificate in Printing Trade from Industrial Training Institute or Vocational Institute or any other recognised Institution.
- (iii) At least five years practical experience in the operation of Offset Printing Machines.
- (iv) Good knowledge of adjustment and lubrication of the Machine, inks and chemicals used in the Offset Printing Machine.

Note

The qualification regarding experience is relaxable at the discrition of the appointing authority in the case of candidates belonging to the Scheduled Castes and the Scheduled Tribes, if at any stage of the selection, the appointing authority is of the opinion that sufficient number of candidates from these communities possessing the requisite experience are not likely to be available to fill up the vacancies reserved for them".

(iv) in column 10 for the existing entry, the following entry shall be substituted, namely:—

"By transfer on deputation/transfer failing which by direct recruitment".;

(v) in column 11 for the existing entry, the following entry shall be substituted, namely:—

"Transfer on deputation/Transfer:

Officers under the Central Government holding ana logous posts or with at least five years' service in posts in the scale of Rs. 330-560 or equivalent and possessing the educational qualifications, experience etc. as laid down for direct recruits in column 7.

(Period of deputation shall ordinarily not exceed three years)".

(vi) in column 12 for the existing entry, the following entry shall be substituted namely:—

"Group 'C' Departmental Promotion Committee (for considering confirmation):

- (i) Joint Secretary (Administration)
 Union Public Service Commission,—Chairman
- (ii) Deputy Secretary (Recruitment), [5]
 Union Public Service Commission —Member
- (iii) Deputy Secretary from any other Ministry/Department in the Government of India,

 Member

and

(vii) in column 13 for the existing entry, the following entry shall be substituted, namely:

"Not applicable".

MINISTRY OF INDUSTRY

(Department of Industrial Development)

Central Boilers Board

New Delhi, the 1st October, 1982

G.S.R. 882. -Where's certain regulations, further to amend the Indian Boiler Regulations, 1950, were published as required by sub-section (1) of section 31 of the Indian Boilers Act, 1923 (5 of 1923) at page 653-661 of the Gazette of India, Part II-Section 3-Sub-Section (i), dated the 13th March, 1982 under the notification of the Government of India in the Ministry of Industry (Department of Industrial Development) (Cen tral Boilers Board) No. G.S.R. 277, dated the 26th December 1981 inviting objections and suggestions from all persons likely to be affected thereby till the 9th May, 1982;

And whereas the said Gazette was made available to the public on the 25th Murch, 1982;

And where is no objections or suggestions have been received;

Now, therefore, in expercise of the powers conferred by section 28 of the Indian Boilers Act, 1923 (5 of 1923), the Central Boilers Board hereby makes the following regulations further to amend the Indian Boiler Regulations, 1950, namely:-

- 1. (1) These regulations may be called by the Indian Boiler (Third Amendment) Regulations, 1982.
- (2) They shall come into force on the date of their publication in the Official Gazette.
- 2. In the Indian Boiler Regulations, 1950 (hereinafter re ferred to as the said regulations)—(1) in regulation 282, for clause (b) and (c) the following clauses shall respectively be substituted, namely: --
 - "(b) Limits of cast Iron.—Cast Iron shall not be used for.—
 - (a) Temperatures above 220 °C;
 - (b) Pressure exceeding 13 bar guage;
 - (c) Valves exceeding 200 mm nomianl bore which are connected directly to the boiler.
 - (d) Wedge or double disc gate valves which are connected directly to the boiler.
 - (e) Boiler blow down fittings.

Explanation—The expression 'connected directly to the boilers covers and valve which cannot itself be isolated from the boiler.

- (c) Limits of copper alloy —Copper alloy shall not be used for temperatures above 225" where the valves are connected directly to the boiler. In the case of valves not connected directly to the boiler this temperature limitation may be increased to 260'C".;
- (2) in regulation 290, (a) in caluse (a) the following shall be inserted at in the end namely:-

"Hydraulic test shall be made with water which may contain a corrosion inhibiter, with kerosene or with other suitable liquid provided its viscosity is not greater than that of water at a test temperature not above 52 °C".;

- (b) after clause (d), the following clause shall be alded, na cly:-
 - (e) The working pressure and the minimum thickness of the steel valve chest of spherical cross section shall be determined by the following formula, namely-

Working Pressure
$$D=0.8 (T=C)$$

$$T = \frac{WP \times D}{4f + 0.8 WP} + C$$

4f -- 0.8 WP

Where T=the minimum thickness of the chest.

D=the external diameter of the chost.

f=allowable stress for the material to be determined on the basis given in clause (d) above.

c=the minimum possitive tolerance as specified hereunder;

For Cast Steel chest C=5 mm.

For Forged or stainless steel chest C=2.5 mm";

- (3) in regulation 292, for clauses (a), (b) and (c) the following clauses shall respectively be substituted, namely:-
 - "(a) Ordinary left safety valve.—A safety valve in which the valve head lifts automatically a distance of at least D/24 with an over-pressure not exceeding 10% of the set pressure. There shall not be any mechanical stop which would prevent the valve head from being lifted a distance of at least D/8. D is the minimum bore of the body
 - (b) High lift safety valve.—A safety valve in which the valve head lifts automatically a distance of at least D/12 with an over pressure not exceeding 10% of the set pressure. There shall not be any mechanical stop which would prevent the valve head from being lifted a distance of at least D/8.

D is the minimum bore of the body seat.

- (c) Full lift safety valve. A safety valve in which the valve head lifts automatically a distance such that the area of discharge which limits the flow through the valve is between 100% and 80% of the minimum area at any section at or below the body seat. This lift is achieved by a rapid opening within an over pressure not exceeding 5% of the set pressure.";
- (4) In regulation 293, for clause (a) and (b) the following clauses shall be substituted, namely -
 - "(a) Discharged capacity of Safety Valves. (a) saturated steam. The rated discharge capacity of a safety valve which discharges saturated steam shall be calculated using the following equation :

 $E \Rightarrow CAP \dots Eqn. (78)$

Where E=is the rated discharged capacity of staturated steam (Kg/h);

> P=is the highest pressure of any safety valve mounted on the boiler (bar absolute);

A=is the area (mm2);

For the ordinary lift and high lift safety valves A is the area of the minimum bore of the body seat. For full lift safety valves A is the area of discharge described in clause (c) of regulation 292 and i ts valve can only be obtained from the safety valve manufacturers. C is a constant taken from the following table, appropriate to the type of the valve or as established by tests carried out in accordance with Appendix L.

Type of valve	Value of the constant 'C'
Ordinarily lift	0.05
High lift	0.10
Full lift	0.24

(b) Superheated steam-The rated discharge capacity of a safety valve which discharges super heated steam shall be calculated using the following equation :-

ES =
$$\frac{\text{E}}{\sqrt{1 + 2.7 \text{ Ts}}}$$
 . Eqn. (79)

Where Es is the rated discharge capacity of super heated steam (kg/h);

- E is the rated discharge capacity of saturated steam calculated using equation (78) (Kg/h).
- is the degree of superheat °C. Equation 79 may be used to determine the rated discharge capacity of safety valves at uppercritical steam pressure. In these cases the saturation temperature of the steam shall be taken as 375°C".
- (5) for regulation 294, the following regulation shall be substituted, namely :-

"Over Pressure of safety valves. Safety valves shall be so designed that they attain the rated discharge capacity with an over pressure not greater than that givesn in regulation 292".

(6) for regulation 295, the following regulation shall be substituted, namely :-

"295.—Pressure Drop.—The safety valves shall reseat at a pressure at least 2.5% below, but not more than 5% below the safety valve set pressure. The 5% limit is increased to 10% for valves having a body seat bore less than 32mm and/or having a set pressure of 2 bar gauge or less".

(7) for regulation 296, the following regulation shall be substituted, namely :--

"296.-Mountings of safety valves.-(a) Safety valves shall be mounted, without any intervening valve, on pads or branches used for no other purpose. The axis of the valve shall be vertical. The cross-sectional area of the bore of each pad or branch shall be at least equal to the area of the bore at the inlet of the safety valve, or where two or more safety valves are mounted on the same pad or branch, at least equal to the sum of the areas of the inlet bores of a all the safety valves.

- (b) Branches shall be as short as possible so as not to impair the proper action of the safety valves or impose any undue stress on the branches at their point of attachment to the boiler. Nothing shall obstruct free flow to the safety valve. Branches, particularly when full lift safety valves are mounted on them, should be radiused at the inlet. The inlet and outlet flanges shall be drilled in accordance with the approximate table in App. E for the diameters of flanges adopted.";
- (8) in regulation 302, in clause (b), after the first sentence, the following sentence shall be inserted, namely :-

"Interference with load on the spring, after the safety valve has been adjusted, shall be prevented by the fitting of a ferrule under the adjusting screw collar, or by using a lock nut on the adjusting screw which shall be further safeguarded by means of a padlock or other suitable device.";

(9) after regulation 306 of the following regulation shall be inserted, namely :-

"306A.—Adjustment of safety valve set pressure.—
The set pressure of a safety valve may be adjusted using air or other gas as the test medium provided that the safety valve

has been subjected previously to hydraulic test in ac cor dance with the requirement of clause (a) of regulation 290".;

(10) in regulation 307, in clause (a), after the last sentence, the following sentence shall be inserted, namely:—

"All the springs above 16 mm bar diameter shall be formed hot and the springs below 16 mm bar diameter shall be formed hot or cold. The springs shall be suitably hardened and tempered.";

- (11) in regulation 343, after sub-regulation (3), the following sub-regulations shall be inserted, namely
 - "(4) Electric fusion welded pipes in which the butt-welds are fully radiographed or ultrasonically tested need not be hydraulically tested in the shops provided the pipe system as a whole is hydraulically tested at site to the requisite test pressure in accordance with regulation
 - (5) In the case of fusion welded pipes test plates to re-present all welded seams shall be attached at each end of longitudinal seam and tested in accordance with the requirements of Chapter XII except that one test plate may represent a lot of pipes up to 60 metres in length and of the same grade of material and same thickness of the pipe subject to the same heat treatment,";
- (12) for regulation 350, the following regulation shall be substituted, namely :-

"350. Steel pipes.-The maximum working pressure allowed on steel pipes shall be determined by the following formula :-

(a) where the outside diameter is the basis for calculation, 2fe(t-c)

(b) where the inside diameter is the basis for calculation. 2fe (t--c)

W.P. = Equation 91A
$$d+t-c$$

Where t

Minimum trickings

WP

Maximum working pressure

steemed as specified

f - Allowable stress as specified in table 3 of regulation 343.

D = Outside diameter of pipe.

d = Inside diameter of pipe.

e=Efficiency factor.

- =1.0 for seamless and for electric resistance welded steel pipes and for electric fusion welded steel pipes complying with the requirements of Chapter II in which the weld is fully radiographed or ultrasionically tested.
- =0.95 for electric fusion welded steel pipes complying with the requirements of Chapter II
- ■0.90 for welded steel pipes for values of t up to and including 22 mm.
- = 0.85 for welded steel pipes for values of t over 22 mm and upto and including 29 mm.

== 0.80 for welded steel pipes for values of t over 29mm C=0.1 cm".

(13) in regulation 360, in clause (b), for the opening paragraph, the following paragraph shall be substituted, namely :--

"Where pipes are butt-welded together, such welds shall be effectively stross-relieved when the wall thickness is 20 mm thick or greater or carbon content of the steel exceeds 0.25% or pipes are made of alloy steel in accordance with the following ".

- (14) in regulation 361, after clause (b), the following clause shall be inserted, namely :-
- "(c) For the forged bends, the radii shall be not less than thoso given below :--

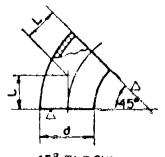

Long radii forged bends R = 1.5 xdShort radii forged bends R = 1.0xd

The thickness at any point of the bend shall not be less than 87.5% of the nominal thickness of the bend. The thickness at any point of the bend shall be such that the minimum thickness required by equation 91 is maintained throughout after finishing operation.

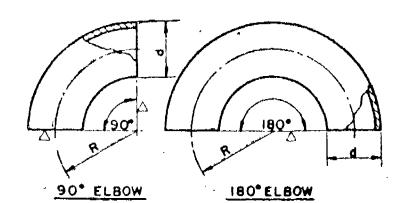

(15) after regulation 361, the following regulation shall be inserted, namely :-"361A. Butt-welding fittings,-The Butt-welding fitt-

ings shall conform to the dimension and tolerances given in the tables given below :--

STEEL BUTT WELDING FITTINGS

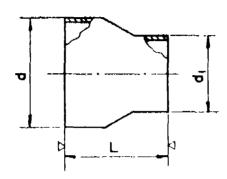

Nominal Diameter	đ	R	L~
25	33.7	38	22
32	42-4	48	25.5
40	48-3	57	28.5
50	60.3	76	35
65	76·1 ♦ 73·0	95	45
80	88 9	114	5 l
100	114.3	152	63·5
125	139 7 *	191	80
150	168-3	229	95

Notes -

- Caps are to be of semi-ellipsoidal shape and are to have a length of straight to make the overall length as specified in Columns 3 and 5. The height of the semi-ellipsoidal portion, measured externally, is to be not less than one quarter of the internal diameter of the cap.
- Lengths E apply to caps of wall thicknesses not exceeding those given in Col. 4.
- 3. Lengths E_1 apply to caps of wall thicknesses greater than those given in Cot. 4.
- 4. d = Outside diameter in mm
 - E or E, + Overall length

(16) in regulation 562, for the first paragraph, the following paragraph shall be substituted, namely:—

"Heat treatment—All boilers constructed to Class I or Class II requirements shall be stress-relieved by heat treatment after completion of all welding and before hydraulic test if any plate is 20 mm thick or greater or carbon content of the steel exceeds 0.25% of the material used in the construction of boiler is alloy steel".

3. In Form III of the said regulations, against item No. 11, for the existing entries the following entries shall be substituted, namely:—

"Details of the safety valves and test results

Manufacturer Identification marks of valves Maker's No. Type Lift (mm)Drawing Nos.
Valves details:
Material Valve Seat Flat/Bevel Diameter of valve seating.
Valve Body:
Material
Opening at neck,
Opening at outlet
Springs: ?
Material
Process of manufacture
Chemical composition
Dimensions:
Outside diameter of coil
Section of wire
Free length of coils
Test results:
Place of testdate
Blow off pressure
Closing down pressure
Remarks:
Does the valve chatter ?
Does the valve seat leak?
Blow off pressure
Type of valve
Place of testdate
Constant 'C' by test results
Capacity of the valve for the intended blow off pressure
Signature of Maker's representative

4. In Form III-C of the said regulations, for the paragraphs beginning with the words "The part" and ending with the words "appended hereunder" the following paragraph shall be substituted, namely:—

"The part has been designed and constructed to comply with the Indian Boiler Regulations for a working pressure

- 5. Below Form III-C of the s_{λ} id regulations, the following shall be inserted, namely:—

"Strike out which is not applicable."

- 6. In Appendix 'G' of the said regulations, in the list of "Well known Steel Makers" the following entries shall be added at the end, namely:—
 - "67, M/S Durgapur Steel Plant, Durgapur-7132013.
 - 7. In appendix 'K' to the said regulations,
 - (1) in the list of "Well known Foundries", the following entries shall be added at the end, namely:—
 - M/S Vidyut Steel Ltd.,
 9 22/1A, 2nd Floor,
 Shapurwadi, Hyderabad-500483
 - M/S Best & Crompton Engineering Ltd.,
 7th Nile Kanakapura Road,
 Bangalore-560 011."
 - (2) in the list of Well-known Forge,
 - (i) for Sl. No. 15 and entry relating thereto, the following Sl. No. and entry thereof shall be substituted namely:—
 - "15. M/S Lakshmi Industrial Forge and Engineers Private Limited, 4 & 6 B.C.I. Estate, Old Madras Road, Bangalore-560016"
 - (ii) in the end the following entry shall be added namely:—
 - "33. M/S Bharat Heavy Electricals Limited, Ramachandra Puram, Hyderabad-500032."
- 8. After Appendix 'K' to the said regulations, the following Appendix shall be inserted, namely :---
 - "Appendix L. Safety valve discharge efficiency testing.

A. General

Inspecting

Authority

tests."

witnessing

- (i) The purpose and manner of testing shall be such as to provide suitable data from which a constant C may be determined in equation 78. To this end the following information shall be supplied to the Inspecting Authority before testing is undertaken.
- (a) Full particulars of the valves to be tested and range of valves and springs which they represent.
- (b) Details of the test rig including instrumentation and proposed calibration procedure.
- (c) Proposed source, capacity, pressure, temperature of steam used for the test.
- (ii) All testing shall be witnessed by the Inspecting Authority or the Inspecting Officer.
- (iii) Tests shall be made to determine the operative characteristics of the safety valves for which a constant is to be determined and also to establish the discharge efficiency of the safety valve.

- (iv) Where possible, the tests to determine operating characteristic and discharge efficiency shall be carried out using the same steam, the same pressure conditions and at the same location. When the tests are carried out separately the valves in each case shall be complete and shall include all internals, e.g. blow-down adjustment rings.
- (v) The set pressure at which the operating characteristics are determined shall be the minimum set pressure for which the spring used is designed. The test shall be carried out using steam and shall determine the set pressure, the lift at the over pressure specified for the type of valve, as defined in regulation 292.
- (vi) The Inspecting Authority may dispense with the operating characteristic tests described in A(V).
- (vii) Discharge efficiency tests shall be carried out using steam and shall be carried out relative to the operative characteristic tests described in A(V).
- (viii) When the Inspecting Authority is satisfied that the design of valve will operate satisfactorily, it shall, if desired, be permitsible to hold the valve head mechanically at the proven lift while carrying out the tests to ascertain the discharge efficiency.

B. Valves used in the test programme

- (i) The safety valves tested shall, as far as is practicable, be representative of the pressure and size range of valve manufactured.
- (ii) The tests for operative characteristics and the discharge efficiency tests shall be carried out on the three sizes or half the number of sizes in the range, whichever is smaller, with a minimum of two sizes.
- (iii) When the range is extended due consideration shall be given, in consultation with the Inspecting Authority, to whether further witnessed tests are necessary.
- (iv) The tests for operating characteristics shall be carried out at three significantly different set pressures for each size of valve.
- (v) The discharge efficiency tests whall be carried out relative to one set pressure for each size of valve.
- (vi) Each tests shall be carried out a minimum of three times to obtain acceptable average results.
- (vii) For the case of valves of either novel or special design of which one size only is being manufactured, tests at one set pressure are permitted by the agreement with the Inspecting Authority. When the range of sizes or pressure is extended due consideration shall be given in consultation with the Inspecting Authority, to whether further witnessed tests are necessary.

C. Determination of Constant C

Let

- F be the measured capacity, on test of saturated steam (Kg/h)
- Pt be the pressure at safety valve inlet at which the capacity was measured (bar gauge);

- A be the area appropriate to the type of valve (mm^a), (see regulation 293(a);
- X be the allowable percentage over pressure for the type of valve under test (See regulation 293).
- Ct be the constant determined from test:

$$A \begin{bmatrix} Pt \\ 1 + \frac{X}{100} \end{bmatrix}$$

To accommodate the permitted spread on test results, tolerance on valve parts and springs, this calculated value of Ct shall be derated to 80% to obtain the value of C to be used in equation 78 of regulation 293 (a). This is to ensure that all production valves will achieve their rated discharge capacity at not more than the over pressure allowed for the type of valve tested.

"The Inspecting Authority may accept a more favourable derating factor of up to 90% of the calculated value of Ct where the performance of the valves under test and the manufacturing and spring tolerances applicable, ensure that the allowable over-pressure for the type of valve under test will not be exceeded when a valve is discharging its rated capacity in service."

New Delhi, the 10th August, 1982

- G.S.R. 884.—In exercise of the powers conferred by the proviso to article 309 of the Constitution, the President hereby makes the following rules regulating the method of recruitment to the post of Financial Analyst in the Ministry of Steel and Mines (Department of Steel), namely:—
- 1. Short title and com neement.—(1) These rules may be called the Ministry of Steel and Mines (Department of Steel) (Financial Analyst) Recruitment Rules, 1982.
- (2) They shall come into force on the date of their publication in the Official Guzette.
- 2. Number of post, classification and scale of pay.—The number of the said post, its classification and scale of pay attached thereto shall be as specified in columns 2 to 4 of the said schedule.
- 3, Method of recruitment, age limit and other qualifications—the method of recruitment, age limit, qualifications and other maders relating to the said post shall be as specified in columns 5 to 13 of the Schedule aforesaid.

- 4. Disqualifications.—No person,—
 - (a) who has entered into or contracted a matriage with a person having a spouse living, or
 - (b) who having a spowse living, has entered into or contracted a marriage with any person,

shall be eligible for appointment to the said post:

Provided that the Central Government may, it satisfied that such marriage is permissible under the personal law applicable to such person and the other party to the marriage and there are other grounds for so doing, exempt a person from the operation of this rule.

- 5. Power to relax.—When the Central Government is of the opinion that it is necessary or expedient so to do, it may for reasons to be recorded in writing, and in consultation with the Union Public Service Commission, relax any of the provisions of these rules with respect to any class or category of persons.
- 6. Saving.—Nothing in these rules shall affect reservations and other concessions required to be provided for the numbers of the Scheduled Castes, the Scheduled Tribes and other special categories of persons in accordance with the orders issued by the Central Government from time to time in this regard.
